

HEAVY RAIN

Before the Rain:

- Ensure drains and gutters are clear of debris to prevent water clogging.
- Prepare an emergency kit with essentials like flashlights, batteries, and non-perishable food.
- Avoid outdoor activities if heavy rain is forecasted.

During the Rain:

- Stay indoors and avoid areas prone to flooding.
- Avoid crossing or standing near rivers, streams, or drainage systems.
- Do not attempt to drive through water-covered roads; just 6 inches of water can sweep a car away.

After the Rain:

- Check for water damage and structural issues in your home.
- Avoid contact with floodwater, as it may contain contaminants.
- Listen to official updates and warnings before going outside.
